## DIRECT AND INDIRECT CONTACT BETWEEN HORSES AND PEOPLE

The most common path for spreading germs and disease is contact among horses, humans and other animals. Bodily fluids such as nasal discharge, saliva and sweat can carry germs which are easily transmitted from horse to horse through direct and indirect contact.

- Limit horse-to-horse contact
  - Limit horse-to-human-to-horse contact
7. No Dogs are allowed on Stampede Park in the 2021 COVID season. Please keep your dogs at home.
  8. Restrict unnecessary movement of horses out of their aisle or barn. Don't take a horse to another barn to be tacked up, braided, clipped, etc. It may seem easier sometimes, but sharing equipment and grooming supplies, or coming into nose-to-nose contact with other horses or soiled surfaces can spread germs.
  9. Do not lead horses down other tent/barn aisles. Don't cut through a tent/barn on your way to the paddock or ring; go around the perimeter of the tent/barn. It may be shorter, but it risks your horse coming into to contact with other horses, soiled surfaces and equipment, dogs, etc.
  10. Don't let horses make nose-to-nose contact with horses from other barns when in common areas such as wash racks, at the rings, or while grazing. Yes, it's cute when they want to visit with each other, but germs can spread just like the cold or flu going through a kid's classroom.
  11. Do not touch or pet, or feed treats to horses from other barns unless necessary. Yes, we all want to pet all the horses we see, but be mindful that you may be spreading germs from one horse to another when you do this.

## EQUIPMENT HANDLING

Soiled equipment is another common path for spreading germs and disease. Nasal discharge, saliva, sweat, and even soiled bedding can carry microbes and spread them via shared items such as tack, equipment, hoses, buckets, grooming supplies and towels.

1. **Do not let water hoses touch buckets when filling.** Contact with a contaminated surface on a water bucket can be easily transmitted to the next bucket contacted.
2. **Do not allow horses to drink from the hose.**
3. **Do not share water or feed buckets.**
4. **Have hand sanitizer readily available,** and use it between grooming/tacking up horses. Keep it handy in the grooming stall, on your golf cart, and in your grooming box at the ring
5. **Use clean brushes and towels on each horse.** If you don't have enough brushes for each horse to have his own set, be sure to wash them often.
6. **Don't share tack and equipment,** especially bits and bridles, unless they are cleaned between each use.

---

## BIO-SECURITY MEASURES

Protecting the health of your horses is of the utmost importance to Rocky Mountain Show Jumping. In addition to the Bio-security Protocol for Vaccination and Event Participation Declaration, Rocky Mountain Show Jumping has compiled this list of Bio-Security Regulations for decreasing the risk of exposure or spread of disease.

1. Be sure to read the Bio-Security regulations, it reviews simple steps we all can take to keep horses healthy!
2. Horses Temperature is an easy way to monitor your horse. Take and record your horses temperature twice daily when it is at rest and NOT immediately following exercise and trailering. Horses temperature should be below 102°F

## RMSJ CONTINGENCY PLAN
